Aimee Farabee

Enterprise AI Enablement and Product Innovation Leader

813-503-0323 aimee.farabee@gmail.com

Professional Summary

Enterprise AI Enablement and Product Innovation Leader with over 15 years of experience delivering measurable outcomes across regulated industries. I specialize in leading complex, cross-functional initiatives that blend robust AI product strategy and operational rigor, ensuring the safe, clear, and valuable adoption of new capabilities. As a systems thinker, I excel at navigating ambiguity, translating technical and business requirements, and bringing structure to unclear problem spaces to bridge execution gaps. My product approach emphasizes rapid prototyping and structured learning cycles, resulting in multiple successful zero-to-one product launches that drive tangible enterprise transformation and business results.

Core Competencies

- AI Strategy, Rollout, and Enterprise Adoption
- Product Strategy and Innovation
- Operating Model and Workflow Design
- Cross Functional Leadership
- Intake, Prioritization, and Portfolio Methods
- Responsible AI and Risk Management
- Change Enablement and Adoption
- Zero to One Product Delivery
- Data and AI Technical Foundations
- Enterprise Transformation Leadership

Tools & Technology

AI Platforms and Frameworks

- Large Language Models
- Machine Learning
- Generative AI
- Python
- Attention Mechanism
- RAG
- Embeddings
- MCP
- Agents
- OpenAI Platform
- Enterprise ChatGPT
- M365 Copilot Studio
- Google AI Studio

Product & Delivery

- Product strategy & roadmaps
- Technical product ownership
- Agile
- SAFE
- Communities of Practice
- Rapid prototyping
- A/B testing
- Zero-to-One delivery
- Iterative, value-focused delivery
- Program management
- Prioritization operating model
- WSJF, RICE, MoSCoW

Cloud & Platform Technologies

- Software-as-a-Service
- API management
- Master Data Management
- Microservices
- Platform-as-a-Service
- Event-driven architecture
- Interoperable APIs
- Vendor integrations
- REST APIs
- AWS
- OpenShift
- Amazon SQS
- Azure DevOps
- Developer Portals

Security & Compliance

- HIPPA
- GDPR
- GxP
- ISO 42001
- NIST AI RMF
- EU AI Act
- US Executive Order
- China regulations
- Authentication & Authorization
- Identity lifecycle management
- Principle of least privilege

Recent Professional Experience

Director, Product Management & AI Enablement Lead

- Built the enterprise AI intake, evaluation, and prioritization workflow to improve clarity, reduce rework, and strengthen governance readiness.
- Led AI enablement, literacy, and adoption programs, including Copilot rollout and the AI Champion Network.
- Delivered Phase 1 of the Scientific Reporting Assistant, achieving a 98 percent reduction in draft report creation time.
- Introduced AI agents and workflow accelerators that improved story creation, refinement cycles, and backlog quality.
- Established measurement models and dashboards that track AI adoption, workflow signals, and productivity outcomes.

Director, Product Management - New Product Development

- Directed the zero to one launch of the Future of Care Pilot in 97 days with FHIR-based integrations and multi-vendor orchestration.
- Delivered mobile capabilities that included AI symptom checking, provider search, scheduling, and care communication.
- Built an API platform for Behavioral Health initiatives with secure data sharing and rapid partner integration patterns.
- Delivered the Remote Patient Monitoring platform with intake APIs, mobile SDKs, and clinical data pipelines.
- Led teams responsible for developer portals and interoperability APIs supporting enterprise-scale integration.

Senior Manager, Chief Technical Product Owner

- Directed migration of Customer and PBM data from on-prem Hadoop to AWS Redshift to improve access and analytics readiness.
- Delivered an automated migration solution that reduced time to market by 70 percent.
- Designed and operationalized the enterprise intake and prioritization model to improve predictability and sequencing decisions.
- Introduced WSJF, WIP limits, commitment tiers, and capacity-aligned planning across delivery teams, improving predictability & transparency
- Led cross-functional forums that aligned business and technology partners on priorities and scope.

Additional experience available upon request

Education & Certifications

Bachelor of Arts in Communications
Florida State University
Graduated: 2003

Applied Generative AI Specialization
Purdue University
Certificate earned: 2025
